Second design hire at a Series B fintech.

Design Lead, Monyo

Lead end-to-end design of Monyo, a new standalone card app, across iOS, web, and Android, including password-free onboarding, card setup, and settings.

Use AI across the whole workflow to move faster: prototyping, iterating on flows, writing code, and QA'ing builds against designs.

Ship production SwiftUI code through GitHub, built the Monyo design system in 12 weeks, and built an AI skill so Claude designs and reviews screens on-system.

Senior Product Designer

Led design of a $9.99 monthly membership that separated app access from bank connection, growing MAU from 600K to 700K+ and winning back ~100K dormant customers in 3 months. Drove ~$7M in advance origination and +$700K in advance revenue; 1 in 3 paywall viewers paid.

Designed multi-card support for up to 6 debit cards and built Credit Genie's design system from Figma tokens to production code, setting the team's design standards.
